OBJECTIVE

To utilize my skills and creativity to build user interface and engaging web experience. I aim to collaborate with cross-fuctional trams to translate design concepts into fully functional website . Also by staying updated with the latest trends and best practices, I strive to deliver visually stunning and optimized websites that enhance user satisfaction and achieve business goals

EXPERIENCE

May-22 - June-23

Front End Developer
HockeyCurve Growth Solutions Pvt. Ltd.
As its an advertisement company so i developed dynamic ads.
PROJECTS
Analytical Dashboard- I worked on the dashboard where we are presenting the data of a particular campaign of a particular client. Like what is the impression, clicks and CTR of a campaign.
Language used- HTML, CSS, JavaScript, sql and php
Selfserve Tool- In this tool a non tech person come and follow the few steps and they can creates an ad without any help of technical person. I design their register, login and forgot password page.
Language used- HTML, CSS, Javascript, sql and php
Product library- In this we are showing Company's Best performing ad with slicing and dicing ad.
Language used- HTML, CSS, Javascript, sql and php.

Aug-23 - Till date
